- Any further information please contact the school or Debbie on mobile- 0419216006
- If you would like to have this newsletter emailed to you please provide the school with your email address.

Legal requirements

Correct child car seats for children's age and size

All children must be safely fastened in the correct child car seat for their age and size. A child who is properly secured in an approved child car seat is less likely to be injured or killed in a car crash than one who is not.

Up to 6 months

Approved rear facing child car seat.

6 months to 4 years

Approved rear or forward facing child car seat.

4+ years

Approved forward facing child car seat or booster seat.

145cm or taller

Suggested minimum height to use adult lap-sash seatbelt.

National child restraint laws

- Children up to the age of six months must be secured in an approved rearward facing restraint
- Children aged from six months old but under four years old must be secured in either a rear or forward facing approved child restraint with an inbuilt harness
- Children under four years old cannot travel in the front seat of a vehicle with two or more rows
- Children aged from four years old but under seven years old must be secured in a forward facing approved child restraint with an inbuilt harness or an approved booster seat
- Children aged from four years old but under seven years old cannot travel in the front seat of a vehicle with two or more rows, unless all other back seats are occupied by children younger than seven years in an approved child restraint or booster seat
- Children aged from seven years old but under 16 years old who are too small to be restrained by a seatbelt properly adjusted and fastened are strongly recommended to use an approved booster seat
- Children in booster seats must be restrained by a suitable lap and sash type approved seatbelt that is properly adjusted and fastened, or by a suitable approved child safety harness that is properly adjusted and fastened.

If your child is too small for the child restraint specified for their age, they should be kept in their current child restraint until it is safe for them to move to the next level.

If your child is too large for the child restraint specified for their age, they may move to the next level of child restraint.

Discovery Bus is coming to Wyaliba Public School

On Thursday the 1st of June.

Parents, playgroup and friends are invited to come along and join in at 1.45pm and participate in the activity Curious Chemicals.

The UNE Discovery Voyager delivers interactive activities to classrooms of regional and rural northern NSW. We aim to inspire students from as young as 4 years old in Kindergarten through to Year 10 students, to capitalise on their natural curiosity and existing knowledge of the environment that we live in, and cultivate confidence and a can-do attitude. We use equipment and methods that schools don't normally have access to, and where we can, link our activities to research happening at UNE.
